SECTION 4 – First Aid

4.1 First Aid for Exposure

- Route of Entry:** Inhalation: If overexposed to dust, remove victim to fresh air & get medical attention
- Route of Entry:** Skin: Wash dust from skin with soap & water. Launder contaminated clothing before reuse
- Route of Entry:** Ingestion: If dust is swallowed, seek medical attention
- Route of Entry:** Eye: Flush eyes thoroughly with water, holding open eyelids. Get medical attention if irritation occurs & persists.

4.2 Signs and Symptoms of Exposure: Use may generate dust that may cause eye & respiratory tract irritation. Dust may be harmful by inhalation & ingestion

SECTION 5 – Fire Fighting Measures

- 5.1 Means of Extinction:** Use any media appropriate for the surrounding fire
- 5.2 Unusual Fire or Explosion Hazards:** This product is not combustible, consideration must be given to the potential fire/explosion hazards from the base material being processed. Many materials create flammable/explosive dusts or turnings when brushed, machined or ground.
- 5.3 Special Fire Fighting procedures:** Toxic fumes may occur. Use respiratory protective equipment.

SECTION 6 – Accidental release measures

Pick up, sweep up or vacuum any dust, place in a container for disposal.
Use of gloves to clean up is recommended

SECTION 7 – Storage, Handling and Use Procedures

Use only with adequate ventilation. Store in a dry location

SECTION 8 – Personal Protective Control Measures

Before use risk assessment should be performed and individual protection measures adopted accordingly.

Stability: Wire power brushes are stable when handled or stored properly. Rust may occur

Reactivity

10.1 Conditions to avoid:

Avoid creating or accumulating fines or dust.

10.2 Material to avoid:

acids

10.3 Hazardous decomposition products:

Dust from brushing & grinding could contain ingredients listed in Section 3 and other potentially more hazardous components of the base material being worked.

SECTION 11 – Toxicological Information

Likely Route of Exposure: Inhalation, skin, eyes. Product as shipped does not present an inhalation hazard; however subsequent operations may create dusts or fumes which could be inhaled.

Eyes: Dust may cause eye irritation. Dust particles may cause abrasive injury to the eyes.

Skin Contact: None expected under normal use conditions. Rubbing product across the skin may cause mechanical irritation or abrasions.

Inhalation: Dust may cause respiratory irritation. May be harmful by inhalation. Prolonged inhalation may cause lung damage.

Ingestion: None expected under normal use conditions. May be harmful if swallowed.

Acute Toxicity: No data

Reproductive Toxicity: Not expected to cause reproductive toxicity.

Carcinogenicity: None of the components of this product are listed as a carcinogen or potential carcinogen by OSHA, NTP or IARC.

Germ Cell Mutagenicity: Not expected to be a mutagen

Repeat Exposure: Long-term overexposure to respirable dust may cause lung damage (fibrosis) with symptoms of coughing, shortness of breath and diminished breathing capacity. Chronic effects may be aggravated by smoking. Prolonged exposure to elevated noise levels during operations may affect hearing. A greater hazard, in most cases, is the exposure to the dust/fumes from the material or paint/coatings being brushed. Most of the dust generated during brushing is from the base material being brushed and the potential hazard from this exposure must be evaluated.

SECTION 12 – Ecological Information

12.1 Eco toxicity: This product contains ingredients that are toxic to aquatic organisms with long lasting effects.

12.2 Mobility: No potentials known

12.3 Persistence and degradability: No biodegradable potentials known
